IMPORTANT: How to recognize a stroke and prevent permanent damage: **(1)** Ask the patient to smile. **(2)** Have the patient attempt to lift both arms above his/her head. **(3)** Have the patient repeat a simple sentence and listen for slurring speech.

If one of the tests leave you feeling doubtful, call **911** and describe the symptoms to the operator. Your quick, decisive intervention may prevent brain damage from an unrecognized stroke. **MEMORIZE THIS CARD. Pass it to friends.**
